Attention: Alan Humphries
Subject: A320 Fuel Ecology Tank Program – EBTEC Welded Floats
Reference: EBTEC commitment and execution of the inlet & outlet float shipments for the A320 NEO Ecology Tank

Dear Alan,

Parker greatly appreciates all of the support we have received from EBTEC on the A320 NEO products we provide to our customers. EBTEC came on strong with the first Parker request to repair existing welded floats, then the production integration of a design change to these same floats by using filler material, and the development of redesigned electron beam welded inlet and outlet floats. Your team has provided prompt, intelligent feedback that has really turned this critical issue around for Parker. I am also personally amazed at your positive attitude when asked to do the impossible and the end result where you actually achieve it! Parker certainly made the right decision in selecting EBTEC to support this large program. Keep it up and I look forward to never needing to worry about electron beam welded floats again!!
